

Technical Training @ FLOWTECH

GOODRIDGE FLUID TRANSFER SYSTEMS

Trainers: Clair Conibear and James Wills

Flowtech were pleased to welcome Goodridge to one of the first product training events to be held in the new Corporate Suite at our Skelmersdale premises.

This was a great opportunity not only to expand the current knowledge of Goodridge product for

Flowtech staff, but also to develop relationships further by providing information about the company and introducing new products.

The two training sessions proved a success in enabling staff from all areas of the company including Technical, Sales, Business Development, Creative Services and the Distribution Centre to get involved in the hands-on training with a question and answer session.

Goodridge are currently focusing on the distribution of products through to dealers and end users. Flowtech play a vital part in this and Goodridge felt that this training day was essential.
